

SNOSAN3B-JULY 2008-REVISED MARCH 2013

### LM119QML High Speed Dual Comparator

Check for Samples: LM119QML

### **FEATURES**

- Available with radiation ensured
  - High Dose Rate 100 krad(Si)
  - ELDRS Free 100 krad(Si)
- Two independent comparators
- Operates from a single 5V supply
- Typically 80 ns response time at ±15V
- Minimum fan-out of 2 each side
- Maximum input current of 1 µA over temperature
- Inputs and outputs can be isolated from system ground
- High common mode slew rate

### DESCRIPTION

The LM119 is a precision high speed dual comparator fabricated on a single monolithic chip. It is designed to operate over a wide range of supply voltages down to a single 5V logic supply and ground. Further, it has higher gain and lower input currents than devices like the LM710. The uncommitted collector of the output stage makes the LM119 compatible with RTL, DTL and TTL as well as capable of driving lamps and relays at currents up to 25 mA.

Although designed primarily for applications requiring operation from digital logic supplies, the LM119 is fully specified for power supplies up to  $\pm 15V$ . It features faster response than the LM111 at the expense of higher power dissipation. However, the high speed, wide operating voltage range and low package count make the LM119 much more versatile than older devices like the LM711.

### **Connection Diagrams**

#### Figure 1. Top View Package Number J0014A

TO-100 Package

Case is connected to pin 5 (V<sup>-</sup>).

#### Figure 3. Top View Package Number LME0010C

#### **Schematic Diagram**

\*Do not operate the LM119 with more than 16V between GND and V<sup>+</sup>

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

| ESD rating <sup>(4)</sup>                      | 800V                           |

(1) Absolute Maximum Ratings indicate limits beyond which damage to the device may occur. Operating Ratings indicate conditions for which the device is functional, but do not ensure specific performance limits. For ensured specifications and test conditions, see the Electrical Characteristics. The ensured specifications apply only for the test conditions listed. Some performance characteristics may degrade when the device is not operated under the listed test conditions.

For supply voltages less than ±15V the absolute maximum input voltage is equal to the supply voltage. (2)

The maximum power dissipation must be derated at elevated temperatures and is dictated by  $T_{Jmax}$  (maximum junction temperature),  $\theta_{JA}$  (package junction to ambient thermal resistance), and  $T_A$  (ambient temperature). The maximum allowable power dissipation at any (3) temperature is  $P_{Dmax} = (T_{Jmax} - T_A)/\theta_{JA}$  or the number given in the Absolute Maximum Ratings, whichever is lower. (4) Human Body model, 1.5K $\Omega$  in series with 100pF.

(1) Output is monitored by measuring VI with limits from 0 to 6mV at all temperatures

(2) K = V/mV.

(3)

Gain is computed with an output swing from +13.5V to +1.5V. Gain is computed with an output swing from +5.0V to +0.5V. (4)

(1) Pre and post irradiation limits are identical to those listed under AC and DC electrical characteristics except as listed in the Post Radiation Limits Table. These parts may be dose rate sensitive in a space environment and demonstrate enhanced low dose rate sensitivity. Radiation end point limits for the noted parameters are ensured only for the conditions as specified in MIL-STD-883, per Test Method 1019, Condition A.

#### LM119 Electrical Characteristics SMD 5962-9679802, ELDRS FREE DC Parameters

(3) Parameter ensured by  $V_{\text{IO}}$  and  $I_{\text{IO}}$  tests.

(4) K = V/mV.

(5) 5V differential across +V<sub>CC</sub> and -V<sub>CC</sub>.

#### SMD 5962-9679802, ELDRS FREE DC DELTA Parameters

The following conditions apply, unless otherwise specified.

 $V_{CM}$  = 0V, Delta calculations performed on QMLV devices at group B, subgroup 5 only.

| Symbol           | Parameter               | Conditions  | Notes | Min  | Мах | Units | Sub-<br>groups |
|------------------|-------------------------|---|-------|------|-----|-------|----------------|
| +I <sub>CC</sub> | Positive Supply Current | $\pm V_{CC} = \pm 15V$ , $V_O = Low$<br>$V^+ = 5.6V$ thru 1.4K $\Omega$ |       | -1.0 | 1.0 | mA    | 1              |
| -I <sub>CC</sub> | Negative Supply Current | $\pm V_{CC} = \pm 15V$ , $V_O = Low$<br>$V^+ = 5.6V$ thru 1.4K $\Omega$ |       | -0.5 | 0.5 | mA    | 1              |
| V <sub>IO</sub>  | Input Offset Voltage    | $^+V_{CC} = 5V, V_{CM} = 1V, R_S \le 5K\Omega$                          |       | -0.4 | 0.4 | mV    | 1              |

(1) Pre and post irradiation limits are identical to those listed under AC and DC electrical characteristics except as listed in the Post Radiation Limits Table. Low dose rate testing has been performed on a wafer-by-wafer basis, per Test Method 1019, Condition D of MIL-STD-883, with no enhanced low dose rate sensitivity (ELDRS).

### **REVISION HISTORY**

| Date Released | Revision | Section   | Originator  | Changes  |
|---------------|----------|---|-------------|--|
| 07/24/08      | A        | New release to corporate<br>format                                  | L. Lytle    | 2 MDS datasheets converted into one<br>corporate data sheet format. Added Radiation<br>information. MDS data sheets MNLM119-X<br>Rev. 0F1 & MDLM119-X Rev 2A2 will be<br>archived.             |
| 01/13/09      | В        | Features, Ordering Info.,<br>Electrical Section, Notes 13<br>and 14 | Larry McGee | Added reference to ELDRS and Die NSID's to<br>data sheet. Correction from: 100k rd(Si) to 100<br>krad(Si) in ordering info. Changed wording in<br>Notes 13 and 14 Revision A will be Archived. |
| 03/26/2013    | В        | All Sections  |             | Changed layout of National Data Sheet to TI format   |

<sup>(1)</sup> The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

<sup>(2)</sup> RoHS: TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (CI) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

<sup>(3)</sup> MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

<sup>(4)</sup> There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

### PACKAGE OPTION ADDENDUM

<sup>(6)</sup> Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

#### OTHER QUALIFIED VERSIONS OF LM119QML, LM119QML-SP :

- Military : LM119QML
- Space : LM119QML-SP

NOTE: Qualified Version Definitions:

- Military QML certified for Military and Defense Applications
- Space Radiation tolerant, ceramic packaging and qualified for use in Space-based application

# NAJ0020A

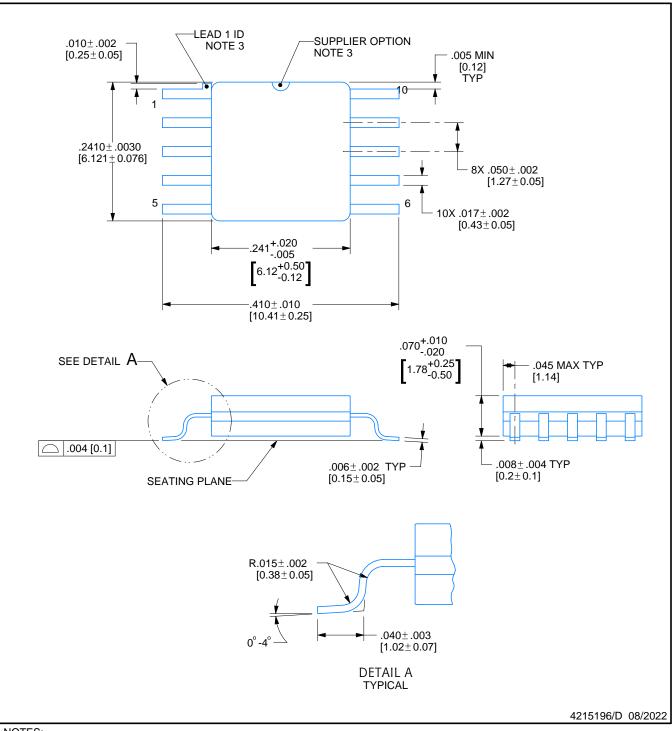

# **NAC0010A**

# PACKAGE OUTLINE

### CFP - 2.33mm max height

CERAMIC FLATPACK

NOTES:

- 1. All controlling linear dimensions are in inches. Dimensions in brackets are in millimeters. Any dimension in brackets or parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M. 2. For solder thickness and composition, see the "Lead Finish Composition/Thickness" link in the packaging section of the
- Texas Instruments website
- 3. Lead 1 identification shall be:
  - a) A notch or other mark within this area
  - b) A tab on lead 1, either side
- 4. No JEDEC registration as of December 2021

### IMPORTANT NOTICE AND DISCLAIMER

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATA SHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES "AS IS" AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI's products are provided subject to TI's Terms of Sale or other applicable terms available either on ti.com or provided in conjunction with such TI products. TI's provision of these resources does not expand or otherwise alter TI's applicable warranties or warranty disclaimers for TI products.

TI objects to and rejects any additional or different terms you may have proposed.
